

Compliance statement of Hellenic Petroleum SA with the European Regulation REACH

REACH Regulation (Registration, Evaluation, Authorisation of Chemicals, (EC) No 1907/2006), requires that producers and importers of substances on their own, in preparations or in articles, provide electronically the European Chemicals Agency (ECHA) with a series of information regarding their identity, characteristics, risks and safe use.

Hellenic Petroleum SA, in respect with the fundamental principle of REACH on the effective management of the hazards of substances, has integrated full REACH compliance into its activities.

Specifically:

- The Company has been participating in various REACH Consortia, joining its efforts with other Companies for the completion of the whole REACH project, including registration, evaluation and authorization, with the application of the Community competition rules
- The preregistration phase was followed by the registration for the produced and imported substances that were subject to the deadlines of REACH article 23 (November 30th 2010, May 31st 2013 and May 31st 2018) depending on their tonnage band.
- The registration dossiers are updated -according to REACH article 22- when revisions of chemical safety reports or/and hazard classification occur due to new toxicological and eco toxicological data or whenever this is required by ECHA's decisions during evaluation of dossiers and substances according to REACH processes.
- The Safety Data Sheets of the products have been updated according to REACH and CLP (Classification, Labeling and Packaging) Regulations. The new extended Safety Data Sheets (e-SDSs) contain in their annex the exposure scenarios for human health and environment per identified use, as well as the recommended risk management measures to downstream users. The e-SDSs are being updated according to article 31(9) of REACH.
- Regarding Authorisation, the crucial regulatory step, is the prioritization of the Substances of Very High Concern (SVHC) recommended by ECHA for inclusion in the Annex XIV of REACH (the authorisation list). Hellenic Petroleum SA follows up the developments, in order to comply with the regulatory measures and also ensure its suppliers' compliance.
